The Ultimate Little Dog Run

“ My little dog -
a heartbeat at my feet.”

~ Edith Wharton

Small dogs have big needs! When it comes to the outdoors, our pint-sized pooches face increased danger from:

- **Coyotes.** Due to urban sprawl, coyotes are no longer confined to the country. Left unattended, small pets can be attacked and killed.
- **Birds of Prey.** Predatory birds such as red-tailed hawks and owls are capable of swooping down on a small dog and carrying it away.
- **Humans.** Small dogs are easier to steal, as they can be picked-up and removed with ease.
- **Larger dogs.** Little dogs have big attitudes and are likely to take on more aggressive dogs two or three times their size.

Smaller dogs are also more likely to become obese. In fact, the American Veterinary Medical Assoc. believes 20% of the dogs in N. America are overweight:

- Smaller dogs are frequently carried instead of walking on their own.
- Pampered dogs share in more snacks while sitting on their companion's lap.
- 54 percent of small dogs stay indoors during the day versus their medium and large counterparts. *

* American Pet Products Manufacturers Association 2005-06 survey.

Welcome to

a lovingly designed enclosure system for
small dogs under 20 pounds (13.5 kg).

Now your prized pet can enjoy the best of both worlds. The freedom and fun of the fresh outdoors. The comfort and security of the safe indoors.

- **No two dogs are alike.** We custom-design each doggie enclosure to meet your pet's individual needs. Choose from a selection of cedar and plastic wood floor liners. Or, place the enclosure right on the grass.
- **Small dogs are unique.** Our enclosures feature tunnels, stairs and multi-level spaces that are easily accessible by small dogs.
- **No two properties are the same.** We design each enclosure with your house and landscaping in mind. Our unique modular system is ideal for balconies, breezeways, apartments, shelters and retail stores.
- **Enclosures are maintenance free.** We offer galvanized and powder-coated steel units to suit all climates and weather conditions.
- **Enclosures are sturdy and escape proof.** Your small dog will have full access to the outdoors but in a safe, controlled environment. As well, our escape-proof hatches will not pinch your doggie's paws. Unlike others, our enclosures are completely enclosed.
- **An array of accessories.** You can accessorize your enclosure with an assortment of pet doors, awnings and hammocks in bright, fade-resistant fabrics.
